Great story Dave---Had to read it in two sittingsBy pkGreat story Dave---Had to read it in two sittings!!!It had me so bad i got sunburnt out by the pool because I couldn't stop reading long enough to walk back inside!!!Looking forward to more books in the future.... I felt like i was there!0 of 0 people found the following review helpful. Breathes life into the Australian OutbackBy HR DubyThis review is based on an ARC, so some of my issues with it will hopefully have been corrected in the final copy. The issues have little to do with the story and everything to do with the formatting, so let me get that out of the way. The copy that I received had nothing in the way of chapters or even section breaks, and that made following the story extremely confusing at times. If those issues are corrected in the final version, I would love to re-read it to see if that confusion is mitigated.On to the meat of the book... This is actually not a book that I would have chosen to read on my own. However, I am still glad that I read it. The author has done an excellent job in breathing life into the Australian Outback and into the characters of the hard-boiled prospectors who make their living off of finding gold and other treasures. I could really visualize the terrain and the book had enough twists and turns to keep it interesting.The book is chockablock with violence and mortal peril, which makes sense in a book about prospectors who stumble too close to a meth operation. Because the author was writing about Australia and Australians, there is a lot of slang I didn't immediately recognize, but readers used to reading based on context rather than content should have no trouble puzzling it out.All in all, I enjoyed the book, and I was glad to get a chance to read a book I wouldn't have otherwise read.Reviewed by HR Duby for Romance Authors that Rock0 of 0 people found the following review helpful. Well-rounded characters, spectacular actionBy MajankaIn Blood Gold Revenge, we meet with a bunch of gold diggers literally looking for gold in the vastness of the Australian outback. Maxine and Scrubber, a husband-and-wife hit team, along with Maxine's brother Price, run interference for Mr. C, who has the biggest meth lab in the country. They often kill lone passers-by. But when a prospector gets murdered, and it turns out he wasn't as alone as Maxine and her gang thought, you end up in a fast-paced thriller that races on until the end. With the state police called in, those who once hunted have now become a prey.It was a thrilling ride of a book, and had a lot of twists I didn't expect. The characters were well-rounded and some of the action was down-right spectacular. Would recommend to everyone who enjoys thrillers. I received a free copy in exchange for an honest review.
